# Changing the Way Mines Operate

*Optimize operations. Minimize cost. Maximize visibility.*

**Easy To Implement**  
Minimize Risk

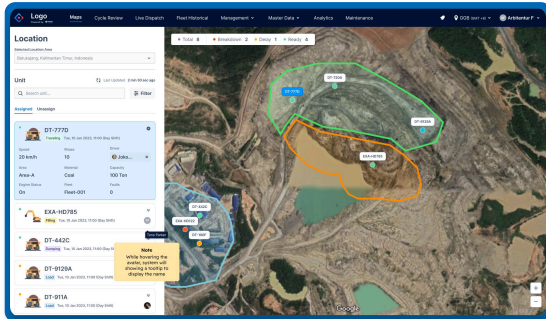

**No Hassle**  
Use Existing Infrastructure

**Subscription Based**  
No Capex

# Fleeto Features What will you get?

## Real-Time Maps

### Easy Tracking. Identify Issues and Take Action Early.

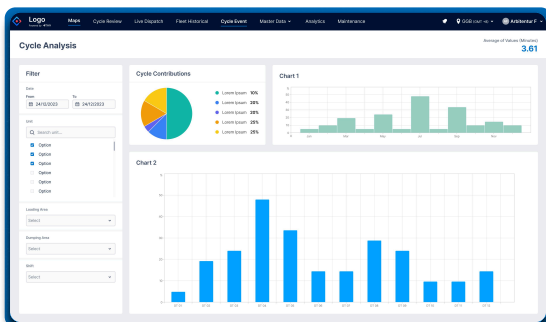

Control with a click, your fleet of Truck, Excavator and Auxiliary Units. Not only for easy-tracking unit status, working area, speed, ritage, but also to identify potential issues and take action early.

## Cycle Review

### Stay-on-Top of Your KPIs

Proactive Life-Cycle Optimization for tracking the production in real-time, to stay on top of availability, compliance (such as production time, filling, queuing, speeding, traveling, dumping) and other top KPIs.

Production Date	Shift	Start Time	Truck Operator	Truck Name	Excavator Operator	Excavator Name	Loading Area	Dumping Area	Action

## Data Analytic

### Improve Your Operation Strategy With Historical Data

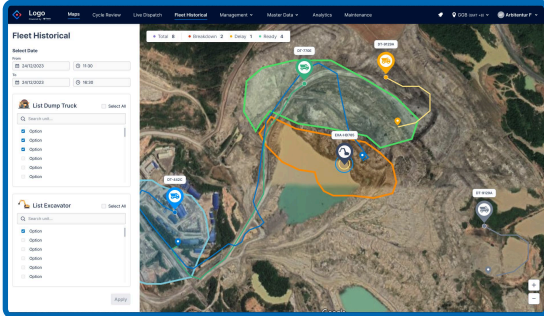

Fleeto Mining provide data analytic using BI reporting that can be used for analyzing historical data. To improve operation related decision strategy that impact people, asset, and process.

## All Features

- Real-time Maps
- Cycle Review
- Cycle Productivity
- Live Dispatch
- Fleet Historical
- Event Management
- Operator Management
- Material Management
- Operator Apps
- Data Analytic

**No Connectivity?** Don't worry, we support OFFLINE MODE. Data collected and stored on the device, to be uploaded when the system is online.

# Fleeto Features What will you get?

## Fleet Historical

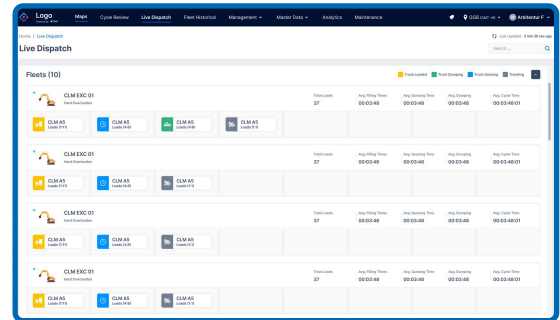

### Playback Your Fleet Operation to Support Decision Making

Playback all fleet operation and process the information to support decision making strategy, by incorporating future optimum operation.

## Live Dispatch

### Optimizing Your Shift Activity

Proactive in overviewing status on real-time condition of fleet and asset (loading, queuing, traveling, dumping), average cycle, and average filling time.

## Cycle Productivity

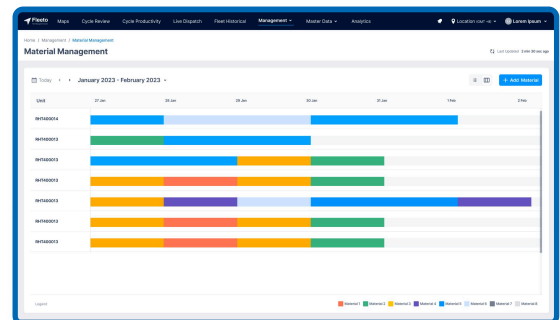

### Increases Visibility Across Your Production

Productivity Performance for tracking production asset in real-time. Fleeto Mining increases information visibility across production aspect, for faster decision making and improving the process & planning.

## Material Management

### Optimize Your Material and Assets

Proactive in managing material and heavy equipment asset for tracking material production. Fleeto Mining generate data tracking material and fleet daily.

# Works Seamlessly with Industry Standard Technology

## Our Compatible Devices

### IoT Devices

- Simple Tracker (FMB920)
- CAN reading devices (TFT100, FMC650)
- RS485 and RS232 devices (FMC125)
- BLE sensors for Temperature, Humidity and Magnet

Also covers driving score and collision detection

### Smart Driving AI

- Advanced Driver Assistance System (ADAS) with AI for early warning and safe driving
- Driver Status Monitoring (DSM) camera with AI for face and behavior recognition
- Fish-eye camera for monitoring
- Alarm Screen
- Speaker

### Fuel Stick and Ultrasound Sensor
