

One Stop Solution for Managing Your Fleet

*Monitor, protect, and optimize your vehicles
through a single, easy-to-use system.*

Value for Money

Small but full of features:
Excessive idling, Anti tampering,
geofencing, night-time restriction.

Secured

Private server protects your
information from hacking.

Email Notification

No unwanted apps.
Simple notification to your Email.
Easy and fast.

Geofence alerting

- Manual: Create virtual line to limit access to or out of certain areas.
- Auto: prevent your vehicle from being moved when it's being parked.
- Limit your vehicle from being used beyond its purpose.

Night-time alert, Excessive Idling, Tampering alert

- Avoid midnight driving of your loved ones.
- Avoid cost of burning fuel unnecessarily.
- Prevent stealing.

Track and Trace Historical trip

- Monitor the latest position of your vehicle.
- Check previous trip of your vehicle.

Driving Score Evaluation

- Avoid reckless driving by assessing driving score.
- Track maximum and average speed, acceleration and cornering angle.

Artificial Intelligence for Safety Driving

- Ensure visibility and transparency by getting snapshot and video recording of the incident, assisted by AI.

Use Case: Who is this solution for?

Electric Vehicle Company

- **Battery Monitoring:** helps to check **SOC** and **SOH** along with **temperature, voltage and charging pattern** to give confidence and comfort In using Electric Vehicles.
- **CAN data Mapping:** helps to map entire CAN data to check for any operational data such as speed, torque, odometer, error code, etc.
- **Track & Trace, Vehicle Management, Geofencing and Dashboard** are also available.

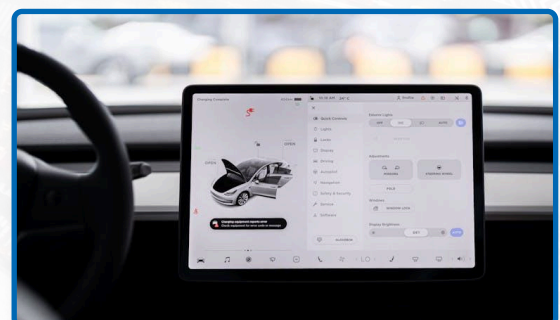

Vehicle Fuel Management

- **Excessive idling alert:** 1500cc car consumes approx. 0.9 liters of fuel/hour. Thus, idling for 1 hour/day and 30 hours/month equals to 27 liters of fuel wasted or IDR 270.000 of pertalite (not to mention the oil usage). Excessive idling mitigates this cost for you.*
- **Anti tampering alert:** track your car even if the connection to your battery is removed. The device is equipped with internal battery.
- **Fuel Meter Monitoring:** Equip your asset with Fuel stick, fuel ultrasound or even sonar to monitor your fuel level at any time.

End-to-End Solutions

- **Procurement Service:** Xapiens is a renowned distributors for our compatible devices, insuring the best price for our customers.
- **Sub-assembly Service:** We help to prepare the hardware to be Plug-and-Play for our customers, as well as to manage the warranty claim and issue troubleshooting.
- **Installation Service**
- **Dashboard Customization**
- **Integration Service:** MQTT and API available.

Works Seamlessly with Industry Standard Technology

Our Compatible Devices

IoT Devices

- Simple Tracker (FMB920)
- CAN reading devices (TFT100, FMC650)
- RS485 and RS232 devices (FMC125)
- BLE sensors for Temperature, Humidity and Magnet

Also covers driving score and collision detection

Smart Driving AI

- Advanced Driver Assistance System (ADAS) with AI for early warning and safe driving
- Driver Status Monitoring (DSM) camera with AI for face and behavior recognition
- Fish-eye camera for monitoring
- Alarm Screen
- Speaker

Fuel Stick and Ultrasound Sensor
