

Xapiens Security Solution Overview

Access Management

Fálaina is a Singapore based cybersecurity technology provider that focuses on Identity and Data Security solutions to enterprises to help them manage their Digital Identities and Data Security challenges. **Fálaina** enables enterprises to secure their infrastructures, applications and data for private, public or hybrid cloud. Fálaina's comprehensive solutions address today's and tomorrow's requirements of an enterprise for:

Identity Governance and Administration (**IGA**), including Privileged Access Management (**PAM**)

Data Access Governance (**DAG**)

Access Management (**AM**)

Why Falaina?

Our IAM solutions include key technologies that can help our customers address the full spectrum of Identify and Access related business challenges.

Specifically, Fálaina:

- Has the most comprehensive set of solutions to manage User Identities and Access Privileges across a range of platforms, including mainframes
- Offers solutions that can protect all your customers' IT resources, from the mainframe to the Web
- Delivers solutions that provide a complete, integrated IAM platform without the need for complex integration across point solutions
- Offers solutions that have been proven in some of the largest and most complex customer environments in the world
- Provides an application vendor-neutral, heterogeneous, systems management approach to enterprise-wide identity and access management
- Provides a modular approach that enables customers to leverage existing investments and add capability gradually—and as their needs expand and evolve
